

Masimo SafetyNet™

A Secure, Cloud-based Telehealth Platform

Featuring clinical-grade spot-checking and continuous measurements, digital care pathways, and remote patient surveillance

Recovery

Pre-surgical care and confident discharge for post-surgical or acute care patients

Chronic Care

Customized care for those with chronic conditions, such as heart- or respiratory-related illnesses

Episodic Care

Continuous measurements using disposable sensors for patients with episodic illnesses, including fever

Seamlessly Extend Care from the Hospital to the Home

A Scalable Solution for Remote Patient Care

Masimo SafetyNet is a secure, scalable, cloud-based patient management platform that allows providers to remotely manage patient care using customized digital CarePrograms™. Patients receive a multi-day supply of disposable sensors or reusable devices, along with access to the Masimo SafetyNet mobile application.

Continuous Wearable Sensor Kit

Lightweight and disposable sensors last up to eight days of continuous use. Paired with the app, data is automatically streamed in near-real time back to the clinician, providing notifications when parameters fall out of a customizable range.

Radius PPG™

Tetherless pulse oximetry and respiration rate powered by clinically proven Masimo SET®

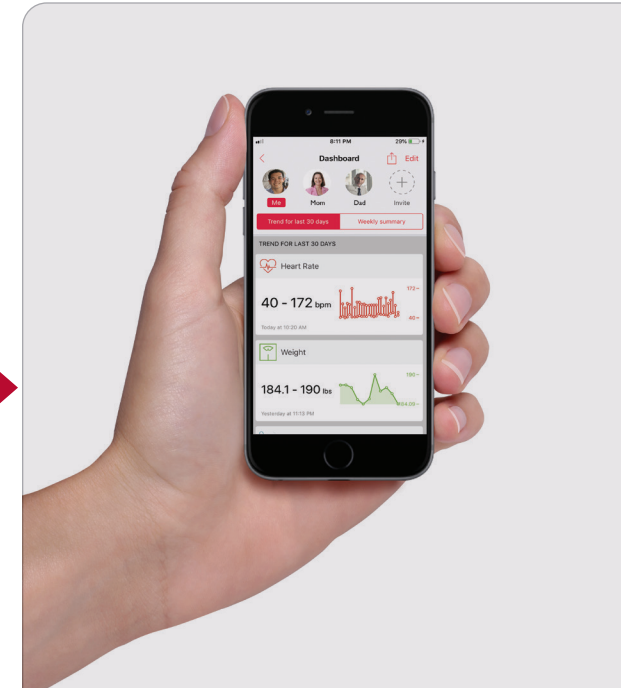

Radius T°™

Wearable thermometer featuring trended data

Spot-Check Home Health Kit

Ideal for chronic and long-term conditions, the spot-check health kit features easy-to-use, reusable devices that can be shipped directly to the patient and quickly paired to the Masimo SafetyNet app for automated data and symptom reporting.

- > MightySat® Rx fingertip pulse oximeter with respiration rate
- > TIR-1™ infrared thermometer, providing non-contact temperature
- > Omron® blood pressure monitor
- > Omron weight scale

Customized Care

Customizable CarePrograms are delivered to patients' smartphones via the app, offering a digital replacement for traditional home-care plans. In addition to automatically pushing data to the hospital for evaluation, the app allows patients to report their symptoms.

Clinician Portal

The Masimo SafetyNet clinician portal allows providers to track patient status and care-plan compliance from the hospital. With automated symptom reporting and customizable notifications, institutions can more easily deploy home-care monitoring at scale while helping clinicians stay informed about important developments in a patient's condition.
